

CONCRETE CUTTING & DRILLING SPECIALIST

DUST FREE • FAST • CLEAN • COMPETITIVE RATES

SUPERCUT (WA) PTY LTD
Concrete Cutting and Drilling Specialist

SUPERCUT (WA) PTY LTD IS THE INDUSTRY LEADER IN CONCRETE SCANNING, SAWING, CUTTING AND DRILLING.

Established in 1994, our organisation has been servicing Western Australia for over 20 years. We provide a full range of commercial, industrial and mining construction services.

We combine over 50 years of operator experience for our jobs.

Our organisation is committed to providing the best scanning, sawing, cutting and drilling solutions for our clients.

We specialise in slab/floor sawing; our saws range from 27hp to 74hp in petrol, electric or turbo diesel. Our machines give us the ability to cut slabs and roadways to 600mm deep. Our capacity ensures we can turn your job around in a fast time frame.

WE HOLD THE FOLLOWING ACCREDITATIONS:

- ✓ **Work Place Clearance Group**
Fuel Industry
- ✓ **Water Corporation**
Grade B accredited Contractor
- ✓ **Georgiou Group**
Precast accredited Contractor
- ✓ **Concrete Sawing and Drilling Association of Australia (CSDAA)**
member

ROAD SAWING/ FLOOR SAWING

Petrol, Electric and Diesel Road Sawing of concrete and asphalt to a depth of 600mm.

APPLICATIONS INCLUDE:

- Expansion joint cutting
- Concrete repair
- Suspended slab removal
- Utility upgrades and repairs
- Curb, gutter and footpath cuts
- Bridge deck repair
- Road repair and upgrades

HAND SAWING AND RING SAWING

Concrete and brick cutting to a depth of 260mm using portable hand held cutters.

APPLICATIONS INCLUDE:

- Doorway openings
- Window openings
- Air Conditioning penetrations and openings
- Concrete kerbing and footings

CORE DRILLING

Diamond core drilling from 14mm diameter to an unlimited diameter and depth using electric and hydraulic machinery.

APPLICATIONS INCLUDE:

- Drilled holes used for plumbing and electrical services, for renovation, demolition or new construction
- Drilling into walls, floors, ceilings, roofs, bridges, tunnels, and road surfaces
- Core sampling of concrete, brickwork and asphalt

CONCRETE SCANNING

Locate reinforcement bars, conduits and structural objects using state of the art Ground Penetrating Radar equipment.

APPLICATIONS INCLUDE:

- Locating sub surface objects
- Knowing the position and depth of structural objects and electrical services
- Void detection, reinforcement cover analysis and concrete thickness

WALL SAWING

Track mounted sawing of concrete and brick to depths of 535mm deep. Flush cutting of floor, walls and ceilings.

APPLICATIONS INCLUDE:

- Cutting sections of slabs and walls
- Cutting stairs
- Large penetrations in concrete structures
- Inverted cutting
